

Tibnor REACH statement

REACH (Registration, Evaluation, Authorization and restriction of Chemicals, 1907/2006/EC) is a regulation of the European Union, adopted to improve the protection of human health and the environment from the risks that can be posed by chemicals.

Tibnor does not manufacture or import any chemical substances or mixtures. However, in accordance with REACH article 33, as a distributor of steel and metal products Tibnor has an obligation to inform its customers if a product contains more than 0.1% by weight of a substance on the REACH Candidate List.

The latest update of the Candidate List is found on <https://echa.europa.eu/candidate-list-table>. The following products in Tibnor's standard stock assortment contain Candidate List substances with more than 0.1% by weight:

Product	Alloy	Candidate List substance
Aluminum	2007, 2011, 2030, 6262	Lead
Brass	CW602N, CW607N, CW614N	Lead
Engineering steel	11SMnPb30, 36SMnPb14	Lead

If Tibnor is supporting customers by sourcing products outside its standard stock assortment, Tibnor will inform the customers if any of these products contain a Candidate List substance with more than 0.1% by weight.

Under the EU Waste Framework Directive, companies that produce, import or supply articles containing Candidate List substances have to submit information on these articles placed on EU market to the SCIP (Substances of Concern In articles as such or in complex objects (Products)) database. The information in the database help waste operators in sorting and recycling articles that contain Candidate List substances, and support consumers in making informed choices and considering how to best use and dispose of such articles. Tibnor is working together with relevant suppliers to ensure SCIP notification compliance.
